

THE NEXT GENERATION SHEATHING SYSTEM THAT DOES IT ALL

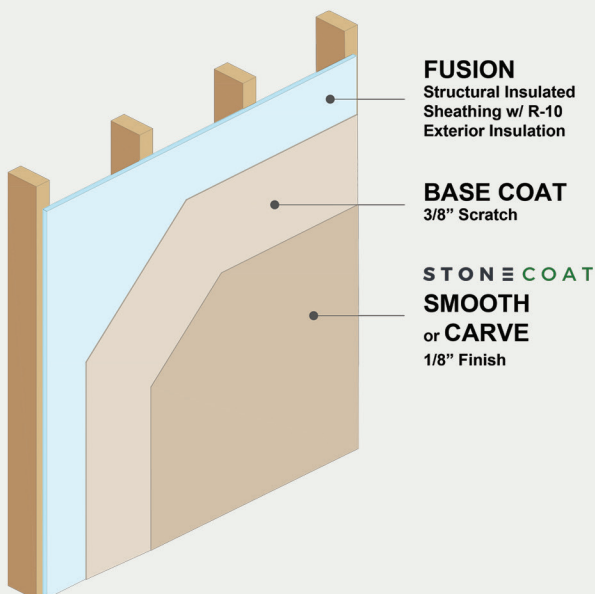

STONECOAT

Build Green. Build the Future.

StoneCoat FUSION®
Structural Insulated Sheathing
Saves Time and Money
Superior Performance

- **4-in-1 Performance** – FUSION is a structural laminate that fuses four layers into one. One panel replaces OSB, exterior insulation, water-resistant barrier and masonry backing, making installation easier and faster.
- **Lightweight** – Weighing a fraction of OSB and other exterior sheathing materials, FUSION offers unlimited vertical construction, in fewer steps, and mounts quickly and easily to the building frame.
- **Part of the StoneCoat system** – FUSION is engineered to work with StoneCoat SMOOTH and CARVE, creating the ultimate high-performance, climate-positive building exterior system. It also works with most cladding materials.
- **Sustainably Crafted** – StoneCoat FUSION laminate is made from recycled petroleum materials, making it the eco-friendly solution.

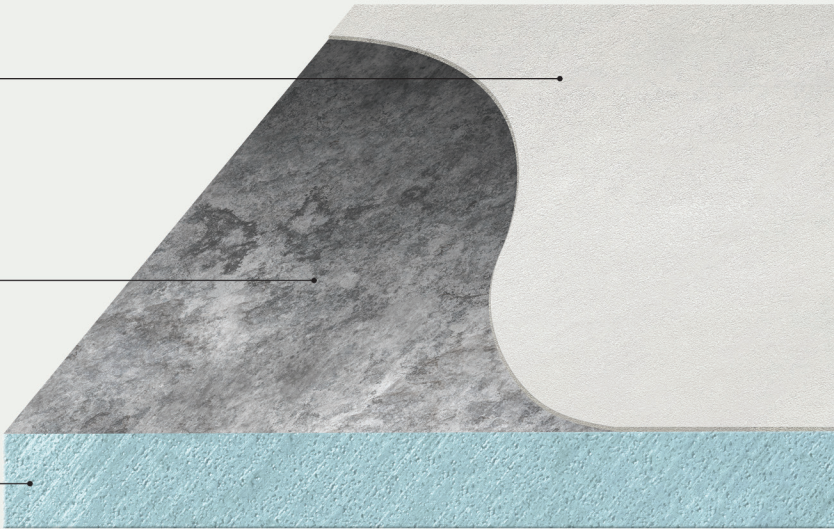

Finished Building Envelope in just 2 Steps

The StoneCoat System provides everything you need for a beautiful, durable, high-performance building exterior. FUSION mounts quickly and easily to the building frame, eliminating the need to install four different layers of material. Then apply SMOOTH for the timeless look of stucco, or CARVE for the elegance of stone veneer.

StoneCoat SMOOTH or CARVE

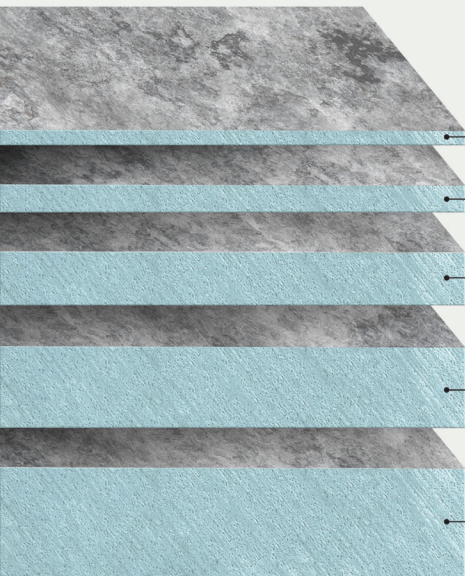

Water-Resistant Barrier

Exterior Insulation

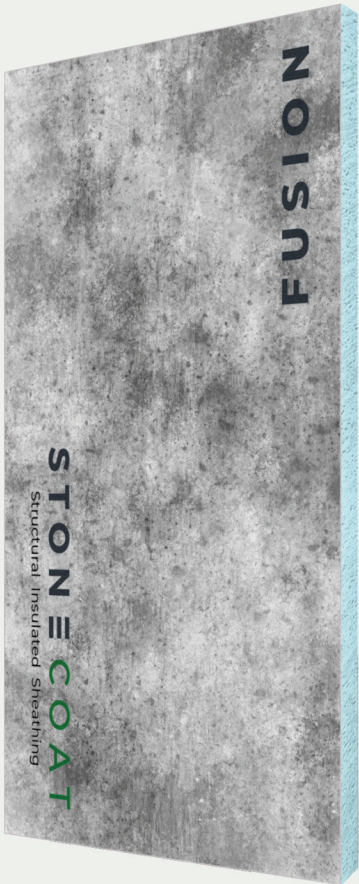

Meets Energy Code Requirements

FUSION'S structural insulated sheathing and integrated masonry backing ensure exceptional design and strength and water resistance. Five thickness options are available, offering up to R-40 insulation performance, so you can meet the energy code requirements in your area.

Thickness	Insulation R-Value
1"	R-5
2"	R-10
4"	R-20
6"	R-30
8"	R-40

US-based climate tech manufacturer dedicated to producing net zero building materials to advance global carbon neutral initiatives
